Office Action Summary	Application No. 09/764,679	Applicant(s) SATO ET AL.	
	Examiner Mark A. Robinson	Art Unit 2872	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the species shown in fig. 8 in the reply filed on 10/25/04 is acknowledged. The traversal is on the ground(s) that applicant should be entitled to examination of a number of species. This is not found persuasive because applicant has not pointed out an error in the requirement or stated that the species are obvious variants of one another.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-17 read on the elected species and will be examined as follows.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2, 3 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point

Art Unit: 2872

out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 12 it is unclear if the structure listed after "for example" is intended to be included in the claimed combination. Thus, the metes and bounds of the claims are unascertainable. For the purpose of examination, the claims will not be limited to the specific types of modulating elements listed as examples.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4,12,13/4 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Bloom 6215579.

Bloom shows in fig. 14 a projecting apparatus including an illuminating system with plural light sources(404) and a prism(406) for guiding the colored lights, a light modulating

Art Unit: 2872

element(402) operating by diffraction, deflection, or scattering, a scanning system having a light deflector(432) for deflecting light from the modulating element, and a projection system (see fig. 16,17) for projecting the beam from the deflector, thereby forming a two-dimensional image.

Allowable Subject Matter

6. Claims 5-11,13/5-7, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the deflecting mirror having the specific light passing and reflecting areas as set forth in the combination of claim 5.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Um, Yokoyama, Gale, and Nakagakiuchi all show various arrangements for scanning and/or projection devices.
